El Pariente Candy plant.

Industrial architecture · 2026

Background

The remodelling separates staff access from raw-material delivery and finished-product dispatch. Employees pass through changing facilities and a sanitary filter before entering production. A transfer corridor connects cooking, cooling and the production floor; packing sits beside finished-product storage.

Framed openings bring the staff and service entrances into a continuous ribbed facade.

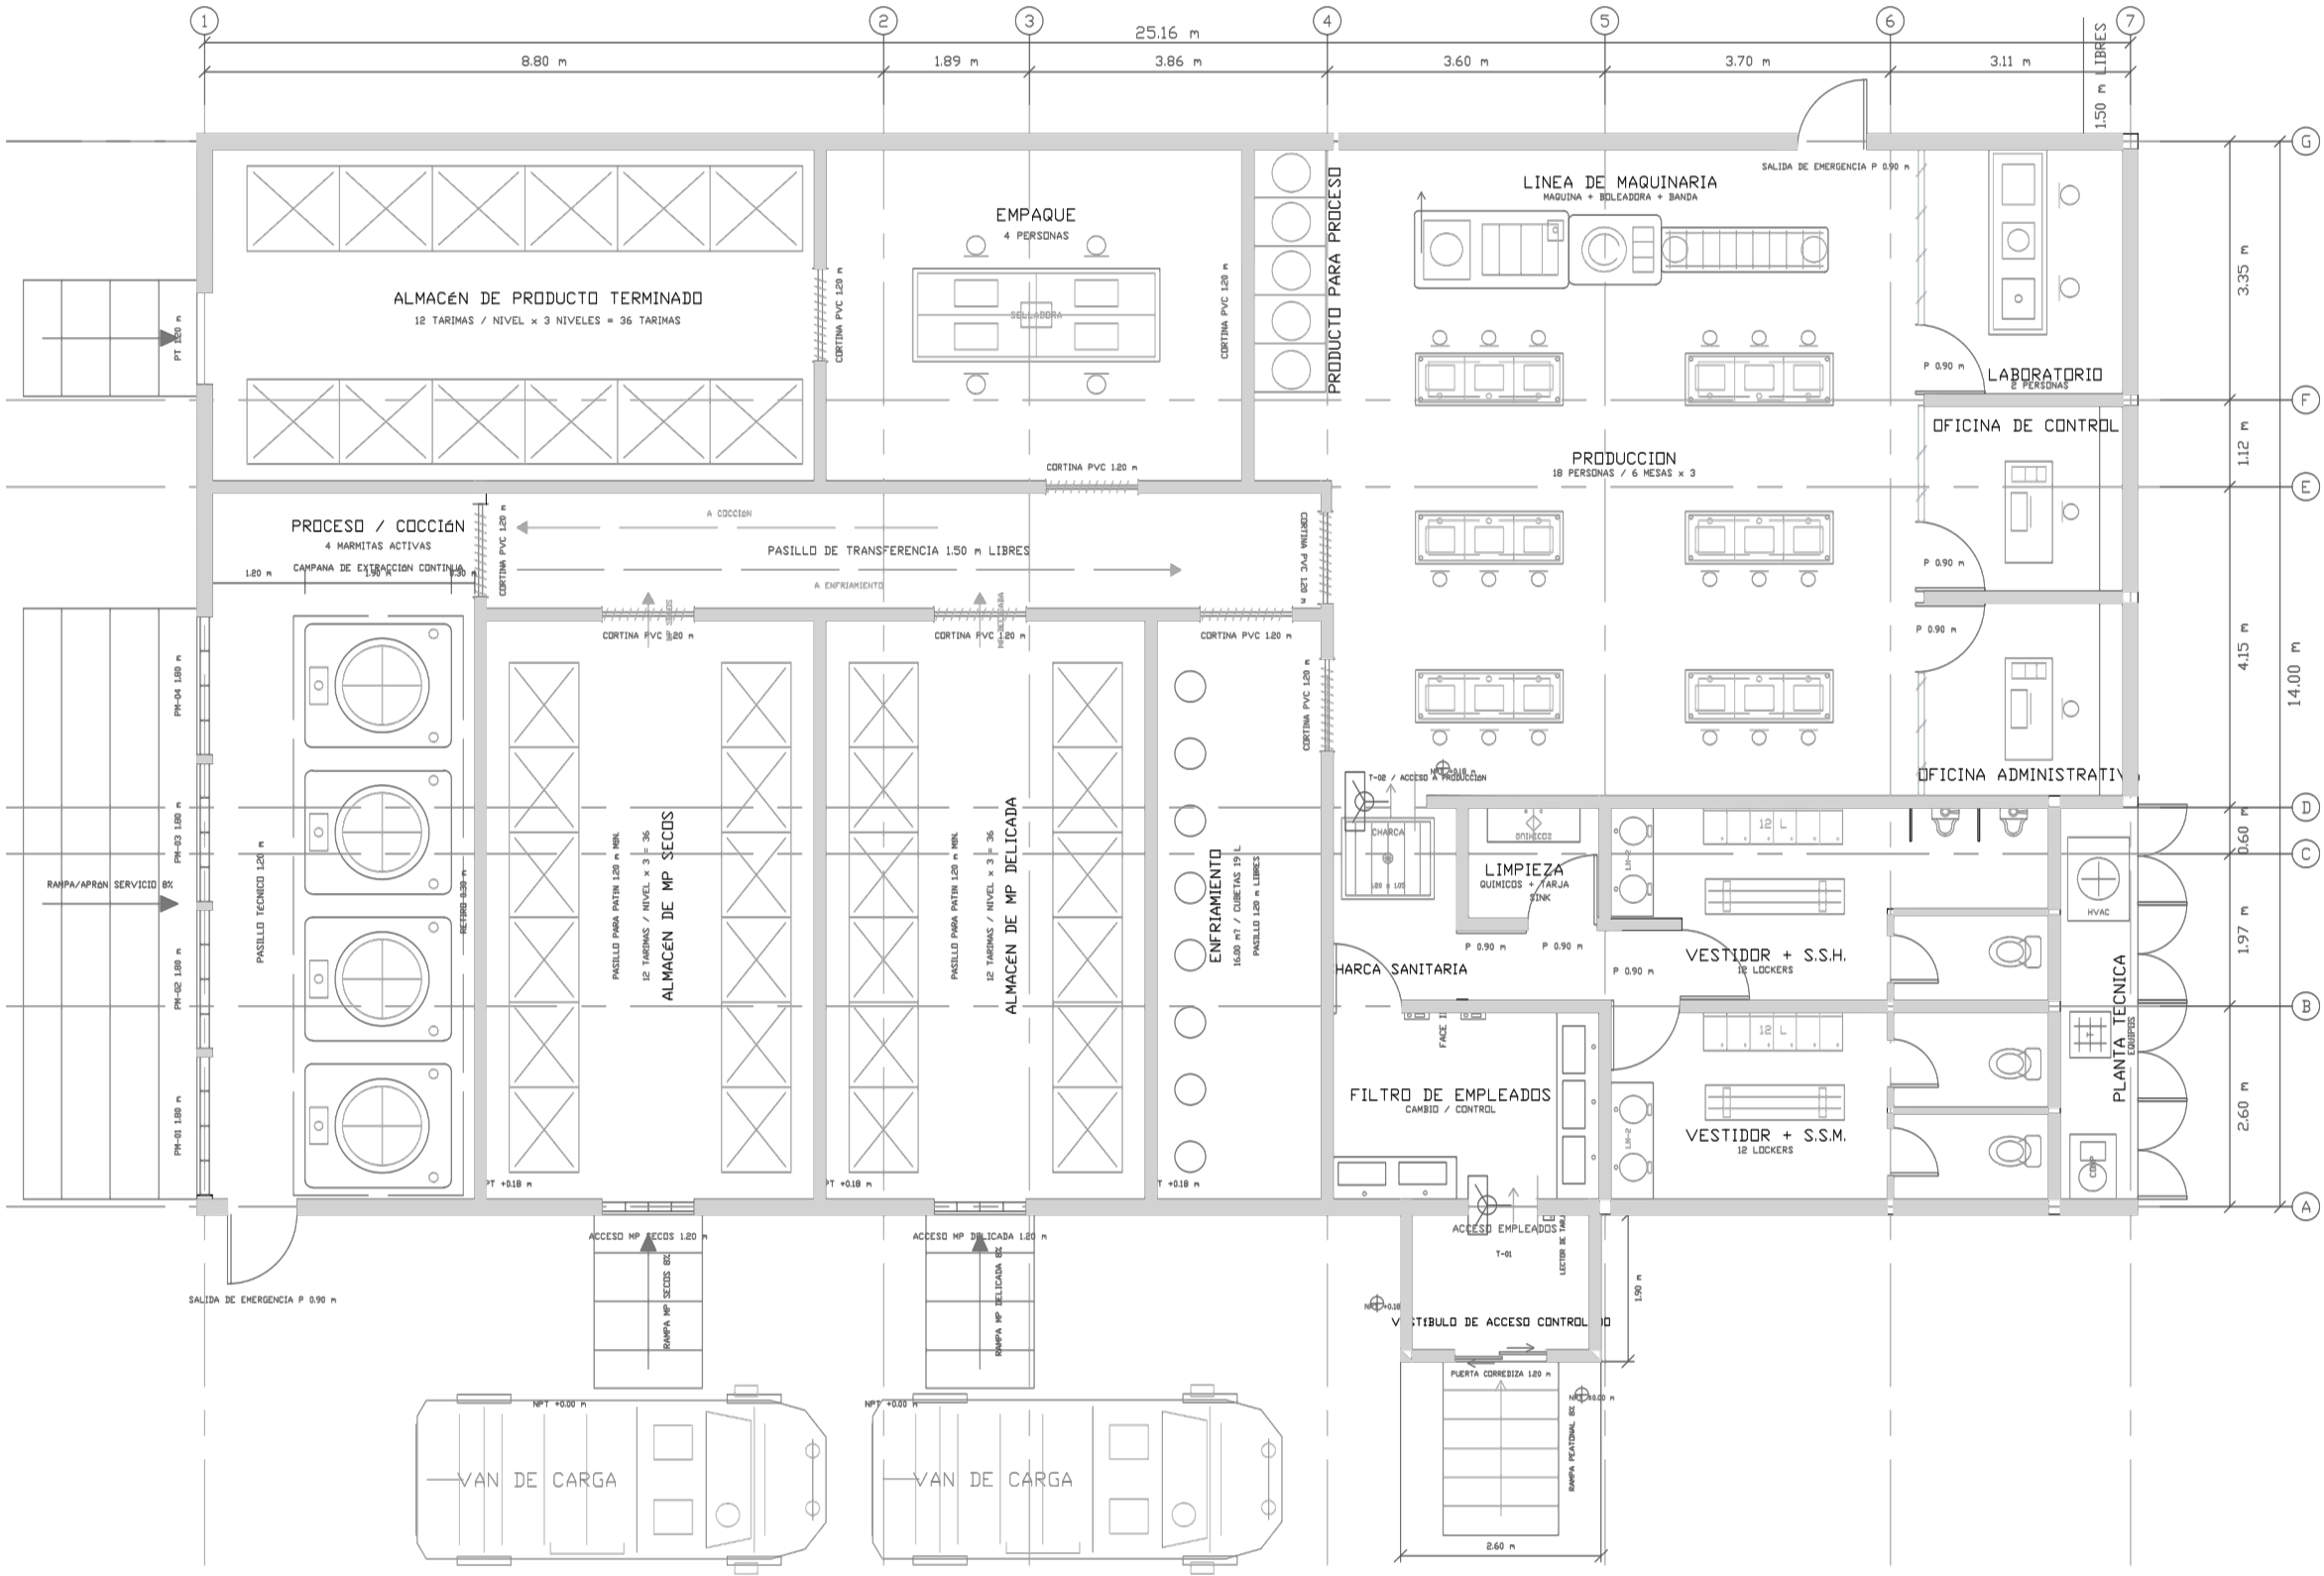

Participation

Francisco Serrano Hess / CH Proyectos

Project coordination with Eugenio Aguado and Daniela Garza, architectural development, 3D modelling, plans and visualisations.

Montemorelos, Nuevo León / 2026
